

Dactylis

Is Dactylis for you ?

Are you sure your customers can generate purchase orders easily ?

If you deliver at least 500 articles to more than 100 customers, you are certainly wasting already a lot of time due to:

- erroneous purchase orders
- wrong article codes given by customers
- obsolete catalogues
- returned material due to mistakes in purchase orders

If you feel concerned by these problems, Dactylis is made for you.

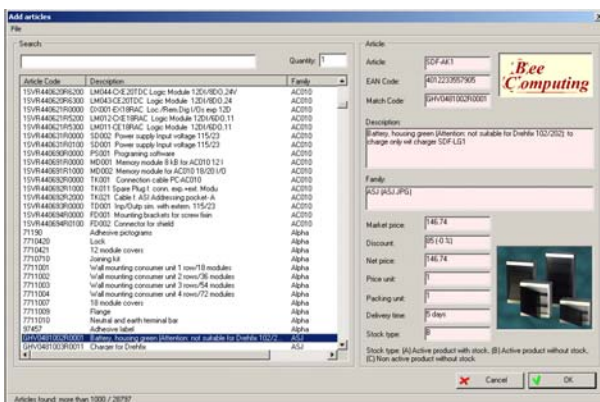

What is Dactylis ?

Dactylis is a purchase order generator.

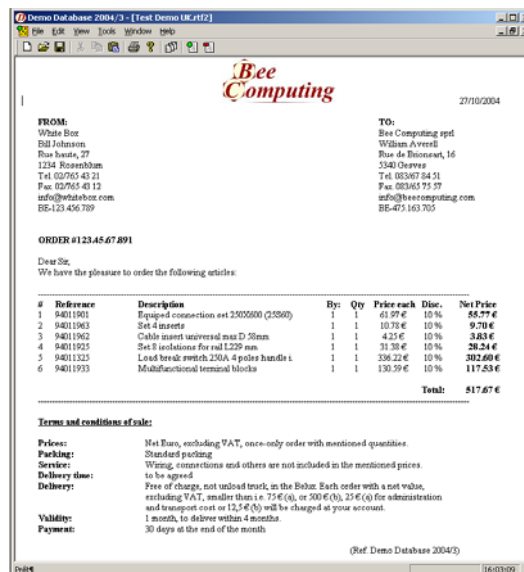

The idea is to deliver to all your customers a CD containing two items:

- a database with all the articles of your catalogue
- the Dactylis software

Using the Article chooser, the customer will generate a state-of-the-art purchase order in minutes

The article chooser

A final purchase order

Advantages ?

The main advantages of Dactylis over a printed catalogue are:

- extremely fast search on keywords, family names or article codes
- automatic generation of the final purchase order
- management of discount codes on a per-customer basis
- no possible error in the article codes, packing quantities or pricing
- always up to date

The main advantages of Dactylis over selling through a web site are:

- very low cost at startup, no maintenance costs
- extremely fast, the customer doesn't need an Internet connection at all
- the customer can save the purchase order, print it for double-signature approval and re-use it later
- the final purchase order is fully compatible with Wordpad
